

UTMT Dump Truck Tires

Off highway tippers are usually faced with harsh working condition and the common practice of overloading. UTECH UTMT is designed to help the clients take on these challenges with its robust steel belt package, strengthened carcass and reinforce sidewall. And ideally it is recommended for hauling applications within the single trip distance less than 5km.

Parts Details Of UTMT Dump Truck Tires

Aggressive multi-block tread design:

- The multi-block tread is designed with tough lugs and increased tread depth to deliver optimum traction.

Extra load capacity enabled by reinforced tire architecture:

- High tensile steel belt package built in to increase the tire strength and to lower risks of puncture.
- The robust carcass is engineered with a loading capacity of up to 8.5 metric tons.

Extend wear life and cut resistance:

- The 32mm super deep tread offers extended wear life.
- Special shoulder-sidewall intersection design are used to increase the cut resistance.
